EDUCATION

- Indian Institute of Information Technology (IIIT), Tiruchirappalli** Aug 2023 – May 2027
Bachelor of Technology in Computer Science and Engineering (CGPA: 7.6) Tamil Nadu, India

EXPERIENCE

- 47Billion** May 2026 – July 2026
Software Development Engineer Intern Indore, India
 - Engineered a RAG-based QA Bot utilising **LangChain**, driving an 80% reduction in manual query resolution time and achieving 90% retrieval accuracy for critical internal workflows.
 - Architected robust data pipelines using **vector embeddings** to process gigabytes of textual data, delivering scalable contextual awareness to LLMs across complex state machines.
 - Optimised model performance and reasoning capabilities through advanced **prompt engineering**, successfully decreasing autonomous task hallucination rates by 90%.

TECHNICAL SKILLS

- Backend & Microservices:** Spring Boot, Spring Security, Node.js, Express, WebSocket (STOMP), REST APIs
- AI & Data:** LangChain, AI Agents, RAG, Prompt Engineering, Vector Embeddings
- Languages:** Java, C++, JavaScript (ES6+), Python, SQL (PostgreSQL), HTML/CSS
- Infrastructure & Tools:** Docker, Kubernetes, AWS, Git/GitHub, Linux, Judge0, Maven, Postman
- Frontend:** React.js, Redux Toolkit, Tailwind CSS, Monaco Editor, WebRTC

PROJECTS

- LiveInterview — Real-Time Collaborative Platform** | [Code](#) | [Live](#) Jan 2026 – March 2026
 - Tech Stack:* Spring Boot, React.js, PostgreSQL, WebSockets, WebRTC, Judge0
 - Engineered a real-time collaborative technical interview platform supporting 100+ concurrent users with sub-50ms latency.
 - Implemented low-latency code synchronisation via **WebSockets**, designing role-based event broadcasting to guarantee strict state consistency across distributed clients.
 - Secured remote code execution by proxying **Judge0** API requests through a Spring Boot backend, mitigating client-side vulnerabilities and preventing API abuse.
 - Designed real-time interview integrity monitors (ESC key detection, clipboard tracking) to analyse event streams and ensure session security.
- Sangraj Rentals — Highly-Available Booking Engine** | [Code](#) | [Live](#) Jul 2025 – Nov 2025
 - Tech Stack:* Spring Boot, React.js, PostgreSQL, Spring Security
 - Architected a full-stack vehicle booking engine, optimising complex relational database states to support dynamic hourly scheduling and real-time availability tracking.
 - Enforced strict transactional isolation in **PostgreSQL**, effectively eliminating double-booking race conditions during high-traffic concurrent requests.
 - Integrated comprehensive Role-Based Access Control (**RBAC**) using **Spring Security and JWT**, establishing rigorous authorisation protocols for administrative fleet workflows.

PROGRAMMING ACHIEVEMENTS

- Flipkart Grid 7.0 Semi-Finalist:** Advanced to National Semi-Finals by engineering optimal solutions for complex algorithmic problem statements. ([Certificate](#))
- Competitive Programming:** Solved numerous problems across multiple platforms, focusing on advanced data structures, constructive algorithms, and dynamic programming.
- LeetCode:** Achieved a maximum rating of 1792; Top 3% globally in Weekly Contest 445 (Rank 702/25k).
- CodeChef:** Attained 3-Star coder status (Max Rating 1672); secured Global Rank 203 in Starters 179 (Div 3).

CERTIFICATIONS & EXTRACURRICULARS

- Stanford ML:** Certified in Supervised Learning & Advanced Neural Networks via Coursera ([Cert 1](#), [Cert 2](#)).
